

Ribosome (budding yeast)

Biosynthesis of secondary metabolites (budding yeast)

Ribosome biogenesis in eukaryotes (budding yeast)

Oxidative phosphorylation (budding yeast)

Carbon metabolism (budding yeast)

RNA polymerase (budding yeast)

Longevity regulating pathway – multiple species (budding yeast)

Starch and sucrose metabolism (budding yeast)

Amino sugar and nucleotide sugar metabolism (budding yeast)

Biosynthesis of nucleotide sugars (budding yeast)
